

Contents

1	Introduction	9
1.1	Dynamic Systems	9
1.2	The Contents of This Book	10
2	Mathematical Modeling	13
2.1	Introduction	13
2.2	How to Develop Dynamic Models	14
2.2.1	A Procedure for Mathematical Modeling	14
2.2.2	Mathematical modeling of Mass Systems. Model Terms	15
2.2.3	Mathematical Modeling of Thermal Systems	23
2.2.4	Mathematical Modeling of Motion Systems	26
2.2.5	Mathematical Modeling of Electrical Systems	32
2.2.6	Electro-Mechanical Systems. DC-motor	36
2.3	How to Develop Static Models	44
3	Model Forms and Time-Response Calculations	49
3.1	Introduction	49
3.2	Differential Equation Models	50
3.2.1	Classification of Differential Equations	50

3.2.2	State-Space Model	52
3.2.3	Block Diagram of Differential Equation Models	56
3.2.4	Analytical Calculation of Time-Responses for Differential Equation Models	60
3.2.5	Calculation of Static Response	63
3.2.6	Numeric Calculation of Time-Responses for Differential Equation Models	65
3.2.7	Simulation Tools for Differential Equation Models	73
3.2.8	Linearization of Non-linear Models	73
3.3	Transfer Functions	77
3.3.1	Introduction	77
3.3.2	Definition of Transfer Function	78
3.3.3	Characteristics of Transfer Functions	82
3.3.4	Transfer Functions of State-Space Models	82
3.3.5	Transfer Function Matrix for Multivariable Models	85
3.3.6	Block Diagrams of Transfer Function Models	86
3.3.7	Block Diagram Manipulation	90
3.3.8	Analytical Calculation of Time-Responses for Transfer Functions	93
3.3.9	Calculation of Static Time-Response with The Final Value Theorem	95
3.3.10	Numerical Calculation of Time-Responses for Transfer Function Models	98
3.3.11	Simulation Tools for Transfer Function Models	100
4	Standard Transfer Functions and Dynamics	101
4.1	Introduction	101

<i>Dynamic Systems</i>	3
4.2 Gain	101
4.3 Integrator	103
4.4 First Order Systems	105
4.5 Second Order Systems	110
4.5.1 Transfer Function Model	110
4.5.2 Classification of Second Order Systems	111
4.6 Systems with Time-delay	120
4.7 Systems with Zeros	123
5 Frequency Response	129
5.1 Introduction	129
5.2 What is Frequency Response?	130
5.3 How to Find The Frequency Response from Experiments . . .	132
5.3.1 The Basic Method using Sinusoidal Input	132
5.3.2 The Correlation Method	133
5.3.3 The Fourier Transform	135
5.3.4 Frequency Response from Estimated Transfer Function	136
5.4 Frequency Response Calculated from Transfer Function . . .	136
5.4.1 How to Calculate The Frequency Response from a Transfer Function	136
5.4.2 Frequency Response Asymptotes in a Bode Diagram .	141
5.4.3 Resulting Frequency Response for Multiplied Transfer Functions	142
5.4.4 Computer Tools for Calculating Frequency Responses from Transfer Functions	144
5.5 Application of Frequency Response: Signal Filters	144

5.5.1	Introduction	144
5.5.2	Lowpass Filters	147
5.5.3	Developing other Filters Using Frequency Transformation	151
5.5.4	Discrete-Time Filters	152
5.6	Application of Frequency Response: Analysis of Control Systems	157
6	Stability Analysis	161
6.1	Introduction	161
6.2	Stability Properties and Impulse Response	162
6.3	Using Step Response in Stead of Impulse Response	164
6.4	Stability Properties and Poles	165
6.5	Stability Properties of State-Space Models	172
6.6	Internal Stability	174
6.7	Tools for Stability Analysis	176
7	Estimation of Model Parameters	177
7.1	Introduction	177
7.2	Parameter Estimation of Static Models Using Least Squares Method	178
7.3	Parameter Estimation of Dynamic Models Using the Least Squares Method	183
7.3.1	Good Excitation is Necessary!	184
7.3.2	Is The Estimate Accurate?	186
7.3.3	Differential Equation Models	187
7.3.4	s -Transfer Function Models	191

<i>Dynamic Systems</i>	5
7.4 Black-Box Modeling	191
A Complex Numbers	197
A.1 Definitions	197
A.2 Relations Between Cartesian and Polar Form	198
A.3 Calculation Rules and Identities	199
B The Laplace Transform	201
B.1 Properties of The Laplace Transform	201
B.2 Transform Pairs	202
C Matrices and Vectors	205
C.1 Definition	205
C.2 The Transposed Matrix	205
C.3 Addition and Multiplication	206
C.4 Determinant	206
C.5 The Inverse and The Adjoint	208
C.6 Diagonal Matrices and Identity Matrices	208
C.7 Rank	209
C.8 Eigenvalues and Eigenvectors	209
D Greek Characters and Decimal Prefices	211
